Srishti Jain

UX Researcher | Mixed-Methods Researcher | Product Researcher

+91-9468544001 jainshivi.rb@gmail.com LinkedIn

Professional Summary

UX Researcher with ~4 years of experience leading end-to-end mixed-methods research across enterprise, B2B, and SaaS platforms. Skilled in translating complex business problems into evidence-based product and design decisions through generative discovery, usability testing, and behavioural analytics. Experienced in AI-assisted research workflows, stakeholder storytelling, and embedding user-centred thinking across cross-functional teams. Passionate about driving measurable UX impact and scalable research practices in global digital ecosystems.

Research Focus

Enterprise SaaS | Behaviour analytics | AI-assisted UX research | Product strategy insights

Professional Experience

UX Researcher - IBM

March 2025 - Present | Kochi, Kerela

- Drove mixed-methods discovery research for enterprise SaaS workflows using interviews, usability testing, and card sorting, uncovering key friction points that informed product roadmap prioritization and feature design decisions.
- Evaluated AI-assisted product capabilities focusing on trust and explainability, informing engineering decisions around model behaviour and guardrails.
- Defined UX research roadmaps with product and engineering stakeholders, aligning high-impact studies to sprint cycles and MVP milestones to ensure research directly informed feature prioritization and product release decisions.
- Facilitated design thinking workshops with 20+ cross-functional stakeholders to frame problem hypotheses, align teams on user needs, and identify actionable solution opportunities for upcoming product initiatives.
- Leveraged AI tools (including LLM-based synthesis and automated tagging) to accelerate research planning, affinity clustering, and insight generation reducing analysis turnaround by ~30%
- Presented research findings to senior stakeholders through structured narrative storytelling, driving evidence-based decisions on feature prioritization and UX strategy

UX Researcher - Entropik Technology

Sept 2024 - March 2025 | Chennai, Tamil Nadu

- Delivered 10+ end-to-end qualitative and quantitative research studies translating findings into actionable design recommendations that improved transactional workflows, onboarding journeys, and core user task success rates impacting 1M+ users across fintech and media platforms
- Applied AI-assisted behavioural analytics (eye-tracking, heatmaps, session recordings, funnel analysis) alongside qualitative research to uncover behavioural patterns across FMCG B2B e-commerce, media, and financial services, informing UX improvements and longer-term product strategy decisions.
- Collaborated with product managers, designers, and analytics teams to define business problems, sharpen research hypotheses, and translate insights into measurable product outcomes
- Coordinated participant recruitment and usability testing logistics across multiple studies, managing scheduling, screening criteria, and research documentation.

Associate UX Researcher - Crimson AI

Aug 2022 - Sept 2024 | Mumbai, Maharashtra

- Independently led 20+ mixed-methods research studies (interviews, surveys, usability testing, A/B testing, UX audits, user behaviour analytics, and competitor analysis) to uncover user behaviours, needs, and pain points, generating insights that informed product strategy and improved key user experiences.
- Created research-backed user artefacts including personas, journey maps, and empathy maps to highlight user needs and inform user-centred design decisions across product and design teams.
- Built an in-product feedback system and UX metrics dashboard to continuously track user behaviour, task success rates, and satisfaction KPI's enabling data-driven product iterations and demonstrating quantifiable UX impact to stakeholders.
- Established and maintained a competitor and market research repository, enabling cross-team knowledge sharing, preventing duplication, and increasing organizational user centricity.

Education

Dual Degree B.Tech -M.Tech in Cognitive and Neuroscience

2016 - 2022 | Centre for Converging Technologies | University of Rajasthan, Jaipur, Rajasthan

Awards

IBM Culture Catalyst Award

October 2025 | Application Runtimes Team

University Gold Medalist

May 2022 | Centre for Converging Technologies | University of Rajasthan, Jaipur, Rajasthan

Skills

Research Skills

User interviews
Usability testing
Discovery research
Surveys & primary research
Card sorting
A/B & multivariate testing
Persona development
Journey mapping
Information architecture
Competitor research
UX audits
Research roadmap planning
Enterprise design thinking workshops
Stakeholder storytelling
Agile collaboration

Analytics

Heatmap analysis
Behaviour analytics
Statistical analysis
Data visualization
